UNIVERSAL CENTRIFUGE

### CAPP Rondo Universal Centrifuge has been

developed after much research of user feedback and expectations. Occupying a minimal amount of bench space, it offers powerful and efficient centrifugation whilst maintaining a high performance over a long time of use.

The wide range of rotor options guarantee the most versatile scope of application. The extremely userfriendly interface enables you to program the device according to your specific needs. The brushless DC motor technology sustains durability and high performance over many years of use.

CAPP Rondo Universal Centrifuge operates with adjustable speeds ranging from 500 to 4.500 RPM. It has multiple rotor options - with both swing-out and fixed-angle rotors. It is equipped with a large digital display which visualises multiple parameters in the clearest, most comfortable way.

Nine acceleration and nine deceleration modes enable you to start and stop the device without disturbing any fragile samples.

Additionally, **CAPP** *Rondo* **Universal Centrifuge** has an adjustable timer which can be set from 1 to 999 minutes; or the infinite centrifugation mode which is without any time limitation. User safety is increased thanks to the electronic imbalance detection feature, which is activated by any uneven loading of samples.

This centrifuge features a Lid Lock Safety Break, ensuring that the lid remains closed until the rotor has fully stopped its operation. The Emergency Lid Release enables you to open the device once any electricity supply has been removed.

To ensure the ultimate centrifugation performance, **CAPP** *Rondo* **Universal Centrifuge** offers a short spin feature for ultrashort centrifugation and pelleting. The stainless-steel chamber rotor is fully corrosion-free and extremely easy to clean.

**CAPP** *Rondo* **Universal Centrifuge** has an intelligently designed airflow system, which prevents any increase in sample temperature. It has a low-height design, which enables easy loading and unloading of samples.
